REFERENCE COPY OF TECHNICAL DOCUMENTATION FOR ACCESSIONED ELECTRONIC RECORDS (Copied: May 11, 2005)

Records About Japanese Americans Relocated During World War II

Record Group 210: Records of the War Relocation Authority

The National Archives and Records Administration (NARA) has been accepting electronic records into its holdings since the early 1970s. Technical documentation has accompanied each transfer of electronic records. The documentation is necessary to understand the meaning of the digitized bits of information within the electronic records.

Over the decades, NARA has had different procedures for compiling technical documentation into an organized unit for researchers, and different expectations regarding the content and extent of any NARA-produced portions of the documentation. Consequently, the structure, organization and contents of the documentation reflect the procedures in place when the technical documentation was compiled and arranged and may include out of date addresses, telephone numbers, or other items of unrevised information related to the agency that created or transferred the documentation and electronic records to NARA, to the NARA unit that processed these materials, or to the physical media of the electronic records files.

In creating the reference copy of the documentation package, NARA staff have selected from the technical and/or supplementary documentation available for this series or file(s). We have annotated or highlighted the table of contents that follows to indicate which portions of the full documentation for this series or file are included in this reference copy of documentation. Any materials not included here are available upon request. Any user notes prepared after the table of contents was prepared appear before the table of contents. This documentation will differ in structure, organization and contents from technical documentation for other series or files of accessioned electronic records. The readability and visual quality are also variable.

SUPPLEMENTAL USER NOTE 2

**Records about Japanese Americans Relocated During World War II, 1988 - 1989
WRA Form 26: Evacuee Summary Data (“Locator Index”)**

**Records of the War Relocation Authority
Record Group 210**

NN3-060-91-012

During review of the data, staff found 23 records/rows in the file to contain dirty data or blank records. Staff found that the first 10 records of the file are either blank (rows 1, 3-8) or unintelligible (rows 2, 9, and 10). Staff also found 13 records (rows 36-41 and 71923-71929) to contain technical information that was accidentally inserted into the file and can be disregarded. Users may refer to the NARA introduction to the documentation for further information about other inconsistencies noted during processing.

DATA FROM WAR RELOCATION AUTHORITY FORM 26: EVACUEE SUMMARY DATA ("LOCATOR INDEX")

Guide to Documentation

This guide to the WRA Form 26 Evacuee Summary Data dataset is intended to provide pertinent information regarding the use of the documentation package. Elements of this documentation package were collected from a variety of sources including the Bancroft Library at the University of California at Berkeley and the Civil Reference Branch of the National Archives (NNRC). In addition, addendum to this documentation package are the result of a concerted effort by staff in the Center for Electronic Records, Archival Services Branch (NNXA). The documentation collection is comprised of the following:

- The introduction to the documentation outlines some of the larger scale problems encountered during verification of the dataset. Associated with this piece of documentation is the verification statement, describing in some detail the particular discrepancies encountered during hand validation between the sample dump of the dataset, the codebook, and the punch cards.
- The coding and keypunch instructions are copies of the original documents provided to employees of the WRA responsible for coding the original WRA Form 26 and keypunching the data onto IBM cards. These documents are provided to give some background regarding the WRA project.
- The main codebook is that used for verification of the dataset. It provides the user with a guide to translating the codes used by the WRA for keypunching the data. The verification statement should be consulted to provide the user with additional information about some discrepancies which arose between the codebook and dataset.
- Part four of the documentation provides a translation table to the geographic codes used in columns 22 through 26 of the dataset.

- Part five of the documentation package provides a translation table to the occupation codes used in columns 55-57, 58-60, 61-63, 64-66, and 67-69 of the dataset. In addition, original coding instructions for these items are included.
- The last section of the documentation package includes some additional information regarding the information in columns 70 through 75 of the dataset (the file number) and the individual number (columns 39 through 44). In addition, this section includes a table identifying sects of the Buddhist religion and the 'age from emperor at year of birth' translation table.

DATA FROM WAR RELOCATION AUTHORITY FORM 26: EVACUEE SUMMARY DATA ("LOCATOR INDEX")

Introduction

The Evacuee Summary Data dataset contains information about Japanese-Americans interned in 10 camps during World War II by the War Relocation Authority (WRA). The original information was collected on WRA Form 26, coded by employees of the WRA, and keypunched by the agency. Apparently, two sets of cards were created: one set is in the custody of the National Archives, and the second was deposited at the Bancroft Library of the University of California at Berkeley following the termination of the WRA. (See WRA Preliminary Inventory #77, Entry #23 (1955) and Japanese American Evacuation and Resettlement: Catalog of Material in the General Library (1958, University of California)). The cards in the possession of the National Archives are apparently the original set produced by the WRA, based on the opinion of Dr. John Modell of Carnegie Mellon University, Department of History. In addition, the National Archives punch cards were manually annotated by the WRA with information about internees aliases, date of departure and place of destination, and other uncoded information. According to Dr. Modell, the Berkeley cards did not contain such additional information and were a copy of the National Archives cards.

The second set of cards were "read" to tape at U.C. Berkeley during the 1960's and a copy of that tape is currently in the custody of the National Archives. Following the decision to distribute reparations to former internees during the 1980's, the Civil Rights Division, Department of Justice acquired a copy of the dataset from U.C. Berkeley. The Justice Department subsequently transferred a copy to the National Archives. The National Archives set of punch cards were apparently never "read" to tape. Therefore, persons wishing to compare the National Archives punch cards to the electronic dataset should be aware of potential inconsistencies and/or gaps in the information. A number of these are noted below as they were discovered during validation.

The following sections outline some of the 'macro' issues that should be made known about the dataset. These issues were discovered while staff at the Center for Electronic Records

undertook validation processes on the file. More detailed issues regarding inconsistencies in coding and a translation table for actual codes appearing in the dataset appear in a separate document, the validation statement. The remainder of this document discusses those issues regarding the National Archives punch card deck and dataset as a whole, and how the two items relate or do not relate to one another. Among them are issues concerning extraneous records or information in the digital file and information contained in the original National Archives punch cards not included in the digital file.

1) Extraneous Records or Information

Users should be aware of a number of inconsistencies discovered during the preliminary evaluation. The first ten records of the file are either blank (no's 1, 3-8) or have information that is unintelligible (no's 2, 9-10). In addition, records 36-41 contain information that is apparently part of a tape copying routine used at some point in the history of the file and accidentally inserted into the file. These records should be disregarded.

The dataset is presented as a sorted file, sorted ONLY by the last name of the internee. Note that on the sample dumps of the first and last 5 blocks of the dataset (250 records each), the records 11 through 35 at the beginning of the file have a blank () or ampersand (&) in the first column. The file then continues with records in alphabetic order. The last 28 records of the file have numerals in the first column. As part of the validation process, a few of the anomalous records at the beginning and end of the file were checked for in the National Archives set of punch cards. Curiously, none were located.

2) Excluded Records or Information

A lot of what was learned about the electronic version of the WRA file came from comparing the sample dump to the set of punch cards in the National Archives. This provided the opportunity to undertake an evaluation of the extent of the information apparently missing from the electronic dataset, as derived from the Berkeley set of punch cards, but included in the Naional Archives punch card decks.

During the validation process, approximately fifty records from the sample dump were compared in detail to the original National Archives punch card record. As a result of this comparison, it was noted that manual or handwritten corrections to the typed information on the punch card (i.e. year of birth or a mis-spelling of the internee's name) were not corrected. That is, no new card was punched to replace erroneous information about the internee. Therefore, the electronic dataset may contain erroneous information which was corrected only through annotations to the cards.

A second difference between the National Archives punch cards and the digital version is that the punch card decks contain what may be termed 'cross-reference' cards for additional information about internees; particularly aliases. Associated with this issue is the inclusion on the cards of handwritten information about the internee which was not coded. This includes such items as when the internee left the camp, what the intended place of destination was, and information about transfers between camps. This sort of information is not a part of the digital database.

Finally, note that the file does not include information for those individuals who were born in the internment camps. Those cases are recorded in the National Archives punch card set, by use of a card with a blue strip across the top, but that information was apparently never keypunched and subsequently not entered into the present dataset.

3) Conclusions

Users of the Data from WRA Form 26 dataset should be aware of some of the problems that may be encountered. Firstly, due to limited verification procedures, the National Archives did not determine the completeness of the dataset. In addition, the file may contain erroneous information about individuals, including entirely blank or unintelligible records. A researcher should be prepared to deal with these problems during preliminary data analysis.

Persons interested in using the information in the electronic dataset for genealogical purposes should be aware of sources available in other divisions of the National Archives or Bancroft Library and should consult those to verify the information. In particular, it should be noted that for researchers interested in information about those born in the camps, this file does not include those records.

DATA FROM WAR RELOCATION AUTHORITY FORM 26: EVACUEE SUMMARY DATA ("LOCATOR INDEX")

Validation Statement

Total Number of Datasets: 1

Title: Data from WRA Form 26: Evacuee Summary Data
("Locator Index")

Number of Datasets: 1

Logical Record Length: 80

When the National Archives acquired custody of this file, the accessioning procedures called for a manual comparison of the documentation to a printout of a portion of the records in each data set. This manual comparison is referred to as a "preliminary assessment" or "validation." In this case, the comparison involved two distinct steps: 1) comparing the sample dump to the available codebook and 2) comparing the sample dump to the set of punch cards in the possession of the National Archives, on which the original coding was interpreted. This two step analysis helped to clarify some questions regarding differences between the sample dump and codebook. This detailed comparison involved approximately fifty records. This is a statement of the results of the preliminary assessment or validation.

The following are discrepancies between the documentation, National Archives punch cards, and sample dump of the data noted during hand validation:

- 1) The codebook outlines the use of a "\n" and/or "\u0000" as valid codes in columns 21, 22-26, 28, 29, 30, 31, 33-34, 35, 36, 37, 38, 45, 47-48, 49-50, 51, 52, 53, and 54, generally to indicate missing or unknown information. These special characters were to be punched in rows 11 and 12, respectively. The National Archives punch cards indicate a "\\" or "*" in similar columns as translated across the top of the cards. The sample dump of the dataset does not contain such characters. Rather, a "-" or "&" is shown. Based on cursory analysis, these special characters are apparently used most frequently in columns 28, 29, 51, and 54. The following translation table may be used to understand the contemporary meaning of the original codes:

Table 1: Translation Table for Special Characters

Coding Character	Row Punch	Punch Card Character	Data Set Character
π	11	\	-
α	12	*	&

2) The variable appearing in columns 33-34, Year of First Arrival in Territorial U.S. for Foreign Born, uses three sets of special characters. For " $\pi\pi$ " and " $\alpha\alpha$ ", use the information provided in table 1 for translation. In the case of the third possibility for this variable, where "--" is used to indicate those internees who were born in the U.S., but had visited Japan, no punches were made and subsequently the field is blank in the electronic dataset.

3) The codebook only outlines codes up through column 54. The printout indicates data were entered through column 80. Although a number of items were not clearly identified in the codebook, the meaning of their values could nevertheless be determined.

- The photocopy of a blank WRA Form 26 punch card shows that columns 55-57, 58-60, and 61-63 were to be used for coding occupations for which the internee was qualified and columns 64-66 and 67-69 were reserved for occupation codes for which the internee had potential. A check of the codes against the occupation code listing (Part 5) included with the codebook shows that the information reported is reasonable.
- In the case of the occupation codes, the appendix (Part 5) lists 'general' occupation codes with an "X" in the second position of the three digit variable. This was to be coded as a " π ", thereby showing as a "\\" on the punch card, and ending up as a "-" in the dataset. For example, for those internees who expressed an aptitude toward technical work, but had no particular experience, they may have been categorized by the interviewer as 0X7, coded as a π 7, punched as 0\7, and now appear in the digital dataset as 0-7.
- Columns 70 through 75 is the six digit 'file number' variable; a unique identifier for each internee. Columns 76 through 80 is an additional identifier for which no information is known. This last item was not translated on the punch card set in the possession of the National Archives, but must have been punched on the set at U.C. Berkeley. According to Dr. Modell, this last data element was neither entered by his project, nor did he recollect the interpretation of it.

National Archives

Washington, DC 20408

Part 2: Coding and Keypunch Instructions

CODING INSTRUCTIONS ETC.

WAR RELOCATION AUTHORITY

WHITECOMB HOTEL

SAN FRANCISCO

TULE LAKE REGIONAL STATISTICAL OFFICE

Before the schedules are ready for the coding, they will be assigned
to punchers which will be October 22, 1942. In the upper left hand
margin of the page, each schedule will also be stamped with the date
and initial, initials for the INSTRUCTIONS TO CODERS.

FORM WRA 26

Each record will consist of one card and the schedules to be used in the
order so indicated at the scheduling.

Coding of the Individual Record (Form WRA 26) is an extremely important task. Our objective is to have the work done as accurately as possible. Great care has been taken to obtain complete and accurate information on the Individual Record forms which you will be coding. Hence the responsibility upon those who code is great, since inaccuracy in coding will make ineffective all the care taken in obtaining accurate information for the Individual Record. The Individual Record (Form WRA 26) will be referred to as a "Schedule" hereafter.

Name is not to be coded. However, coders should check spellings before you record any specific codes, it is a wise procedure to scan both sides of the schedule and to note particularly the data which appear in Item 31 since the additional information added here may influence answers given in other items. Name is to be kept in alphabetical file. If this is the case, it should be so indicated in the "Office Use" column. When each

Although the forms are for individual persons, if the individual is a part of a family, the family should be considered as a unit to check the consistency of such items as spelling of names, previous address, religion, and family numbers and letter. In addition, each schedule should be checked for internal consistency. Procedure for these checks is contained in "Instructions for Consistency Checks." Under Item 1 and a superscript first time appears in Item 1, or vice versa (neither being a nickname). You will use a red pencil in writing the codes. If you want to change a code, erase what you have written and put in the correct code. Never cross out a code and then correct it above or below, because every mark which appears in red pencil on the schedule has meaning for the punch card operator. Hence only correct codes should appear in red, and no other marks of any kind should be made on the schedule in red pencil.

All codes are to be entered in the box marked "Office Use" alongside of the item coded, unless otherwise indicated. Under no circumstances will the coders change the information found on the schedules. However, to each coder is urged to bring to the attention of the supervisor any inconsistencies in answers on schedules for members of one family, and any obvious typographical errors which would influence the coding. The supervisor will make the necessary corrections in ink and initial them. He should be given the right to never let an assembly officer or colored river. Care should be taken in coding I (do not confuse with L), in coding O and O (zero & letter O), G and Q, and U and V. Be sure that these letters are distinct. The small letter o is always used for zero on the code sheet, and

the large letter O is used for the letter.

Before the schedules are sent to the coders, they will be assigned new file numbers which will be written in red pencil in the upper left hand corner above the name. Each schedule will also be stamped in the lower left corner with lines for the coder's and supervisor's initials.

Each coder will initial in lead pencil the schedules he codes in the place so indicated on the schedule. No be written in the margin.

INSTRUCTIONS FOR INDIVIDUAL ITEMS

All items except Items 1, 1a, 6, 12, 12a, 15, 19, 20a, 26, 28, and 29 will be coded and should always have a code unless otherwise indicated. If you can't find the correct code for an item, refer it to the supervisor.

Item 1. Name Code as if the name read "Yoshi English Mary." As follows:

Name is not to be coded. However, coders should check spelling of names and the possibility that first and last names may be reversed. If a person is known by two distinctly different names, it will be necessary to punch two cards for him in order to have both names in our alphabetical files. If this is the case, it should be so indicated in the "Office Use" column. Hence each coder should check the "other names" appearing in Item 1a and use the following rules: (1) If a different last name appears in Item 1a and it is not the maiden name of a married woman or the yoshi name of a married man, refer the schedule to the supervisor who will decide whether two cards should be punched; and (2) If an English first name appears in Item 1 and a Japanese first name appears in Item 1a, or vice versa (neither being a nickname), refer to the supervisor who will add the second name to Item 1.

Item 2. Relocation Project The name only is to be coded. If no name is entered, refer the schedule to your supervisor.

For example: Manzanar is 1, Tule Lake is 4, etc.

Assembly Center is listed in the table on the back sheet.

The name only is to be coded. If no assembly center is listed, we shall assume that the person went directly to the Relocation Project given or was born in the Relocation Project; and hence the code is 0 in this case. Manzanar was an Assembly Center prior to June 1, 1942. If Manzanar is listed in Item 3 with an entry date later than June 1, 1942, the code should be 0 (i.e. that person was never in an Assembly Center). Colorado River, Tule Lake, and the other Relocation Projects were never Assembly Centers officially. Hence, such entries in Item 3 are to be treated as "none" and coded accordingly.

Item 4. Previous Address

The code used will always be a 5 digit code which includes the two digit state code, the two digit county code, and the one digit size of city code. Permanent address is the address to be coded if two are given. For Example: Persons whose permanent address was Chico, California, will receive the code 13-31-2. The code 13 is for the state of California, the 31 is for Butte County, and the 2 is for size of the city.

The five digits are to be written in this manner: 13-31-2.

For example: Pasadena, California, will receive 13-42-2.

The code for children born in Assembly Centers or Relocation Projects will be 5 dashes (non) written in the manner indicated above since they had no previous address.

There are certain sections of Los Angeles City which may be entered on the schedule as separate cities but which should be coded as if the entry read "Los Angeles City." The following sections are part of Los Angeles City:

Eagle Rock Palms
Highland Park Pico Heights etc. The first code is a combination of the first two letters of the name of the section and the last two letters of the name of the city. Hollywood has University Park and years of schooling under "Hollywood". Los Feliz has West Los Angeles in the years given under "Los Feliz". The second code, to be entered directly after the first, is the total of 10 years of schooling.

For other sections of Los Angeles City, check with the Postal Guide, or Rand McNally Map, which gives a list of all post office branches and stations in the city.

Whenever the name of a city appears which is not the appended code, refer it to the supervisor who can check with the Rand McNally maps and give you a correct code.

Persons who have come in to the Relocation Projects or Assembly Centers from internment camps should be referred to supervisor for previous address code. It always refers to the years of his residence in the camp.

Persons who have come in to the Relocation Projects or Assembly Centers from internment camps should be referred to supervisor for previous address code. It always refers to the years of his residence in the camp.

Item 5. Birthplace of Parents

Birthplace of both father and mother will be included in a one digit code as indicated in the table on the Code sheet.

Item 5a. Father's Occupation in U.S. and Abroad

Item 5a does not appear on the unrevised Form WRA 26, and hence the code for this item on unrevised forms will be 17 for both father's occupation in U.S. and abroad. Three codes will always be entered in Office Use column for item 5 on the unrevised forms. In the case where the entire family is reported on the unrevised form, the occupations of the fathers of the head and his wife may not be available, but the head's occupation in U.S. can be coded for his children from the primary occupational code in Item 27 on the head's individual record. In such a case, the

code for the father's occupation in Japan will be (not $\frac{1}{2}$).

The code used will always be a one digit code. You will determine the correct code for each occupation by looking up the United States Employment Service Code for that occupation on the mimeographed code list entitled "Major Occupational Groups and Sub-divisions." When the correct code on the U.S. E.S. list is found, look up the corresponding code on Code Sheet under "Father's Occupation in U.S." and record the code number which you find on that list in the Office Use Column.

For example: Father's occupation in U.S. is gardener and in Japan is farmer. The U.S.E.S. code for gardener is 3-40, which corresponds to code #5 on the Code Sheet. Similarly the U.S.E.S. code for farmer is 3-06, which corresponds to our code of 5. Hence the two numbers 6 and 5, are entered one underneath the other in the Office Use Column.

Item 6. (Is not to be coded) first and second parts of the code.

Item 7. Education: first and second parts of the code.

Only education in Japan will be coded here. The first code is a one digit code indicating the total number of years of schooling in Japan, which will have to be computed from the years given under "from" and "to." The second code, to be entered directly under the first, is also a one digit code indicating which years of the person's schooling was obtained in Japan.

For example: If a person has a total of 10 years of schooling in Japan including 8 years of elementary school and 2 years of College (i.e. - his High School training was not in Japan) then the two codes used would be 4 and 5.

The second part of the code for this item refers to which years of his total schooling was spent in Japan, and it should be remembered that 1-8 years does not refer to elementary always, nor does 9-12 years refer to High School always. For example: if a person first went 2 years to a grammar school in the U.S., then went to Japan and went the full 8 years to grammar school and had no more schooling; he would receive a code of 8 and 4, since his eight years of schooling in Japan included the third through the tenth years of his total schooling.

If a fraction of a year occurs, raise all fractions over $\frac{1}{2}$ and do not raise fractions less than $\frac{1}{2}$. When the fraction $\frac{1}{2}$ occurs, raise all odd numbers and do not raise even numbers.

Entries in Item 31 should be checked before coding. Item 7 is used as there may be supplementary data there which will affect this code. Entries in Item 8 should also be checked, since any person educated in Japan for a given period of time should also reside in Japan at that time.

Item 7a. Educational Degree This code uses a one digit code which is determined by the kind of degree which the person received and his major subject. For example: A person who majored in chemistry and has a Bachelor's degree (B.S. or A.B.) will be coded C; if he has a master's degree, he will be coded P; and if he has a Ph.D. in chemistry, he will be coded (17) (two numbers in parenthesis indicate double punching.)

Do not code a degree of A.A. (Associate of Arts) as it is awarded after the completion of only 2 years of general college studies. If you find a degree which has no code, please refer it to the Supervisor.

Item 8. Residence Outside of the United States This item contains four separate parts which have to be coded, namely:

1. Year of first arrival in territorial U.S. for foreign born only
2. Total length of time in Japan
3. Number of times in Japan
4. Age at time in Japan

The code for this item is a 5 digit code - 2 digits for the first part and one digit for each of the other 3 parts. The code for each of the four parts will be listed one under the other.

Items 20, 20a, and 21 should be checked for internal consistency before coding Item 8. For example; if birthplace (Item 21) is Japan, the residence outside U.S. must include one period from birthdate (Item 20) to year of first arrival in U.S. To code year of first arrival in U.S., simply record the last two digits of the year (i.e. code for 1900 is 00, for 1914 is 14, etc.). Those persons born in the U.S. will receive a code of 11, etc. according to whether or not they have ever been in Japan. Notice Item 21, birthplace, must be checked before coding this item.

Office Use Only. Total length of time in Japan must be calculated from the

years of residence in Japan listed in Item 8.

Item 23 is coded along with the third part of Item 8. That is, the number of times a person has been in Japan is combined with whether or not the person was attending school just prior to the evacuation. Since each visit or residence in Japan is listed separately under Item 8, the number of times in Japan is obtained merely by counting the number of times Japan is listed in this item.

Age at time in Japan must be calculated from birthdate (Item 20) and the years given for residence in Japan in Item 6 (e.g. if a person was born in Japan in 1890, came to U.S. in 1915, returned to Japan in 1920, and came back to the U.S. in 1925, he was in Japan between the ages 0 and 15 and between the ages of 30 and 35; hence the code would be 5). Use scratch paper for all calculations and record only the code on the WRA 26 form. Consider months in making calculations and not only years, as this will affect the code at times.

Items 9, 10, 11, & 13 Military and Naval Service, Public Assistance and Pensions, Physical Defects

All four of these items will be coded in a one digit code. Very often the answer to all of these items is none, so that 0 is the code. If there is an answer to one of the four items, which necessitates a code, insert the correct code. If more than one of these items needs a code, refer the schedule to the supervisor. Where defects are listed under Item 13, refer first to the list of major and minor defects. If the defect listed is an uncorrected major defect, then a code of 9 is necessary; if the defect is minor, then no code is necessary for defects. The code will be entered in "Office Use" Column opposite Item 9.

Item 14. Individual Number

A code will not be inserted in the "Office Use" column for this item, but the number will be copied in red directly above the typed number. Proceed the number with enough zeros to make five digits unless it already has five digits, and add the letter. Where the letter suffix on the individual number is over Z (e.g. A.A.), refer to the supervisor who will indicate the necessary code. Numbers with S.D., O.C., T.L., and other prefixes, refer to the supervisor.

Item 15. (Is not to be coded) Japan by region, India by section, United States by country only.

Item 16 and 18. Sex and Marital Status

Both these items will be coded in a one-digit code in the "Office Use" Column for Item 16. If the sex should be left blank, refer the schedule to the supervisor.

Item 17. Race of Individual and Race of Spouse

Both those items will be coded in a one digit code, which is obtained from the table on the Code Sheet. The abbreviations used in the table are as follows: (1) J - Japanese, (2) J & W - Japanoso and White, (3) J & O - Japanoso and Others, (4) W - White, (5) O - Others, and (6) W & O - White and Others.

Example: If the race of the person on the schedule is Japanoso and the race of his spouse is Japanoso and white, the code is L.

If the race of the individual is blank, refer to your supervisor.

Other races include Chinese, Filipino, Eskimo, Mexican, etc. If you are not certain whether a race written in under this item is white or other, refer to the supervisor.

Race of spouse does not appear on the unrevised WRA 26 form. In cases where the spouse is living with the family group, you can determine her or his race and code it; but in cases where you do not have the schedule for the spouse with the rest of the family schedules, you will have to code race of spouse unknown.

Always remember to check marital status (Item 18) before coding race (Item 17). If the person is single, then he receives one of the codes in the column "No spouse" on the Code Sheet. However, if the person has ever been married, then the code will come from one of the other columns; this is especially important on the unrevised WRA 26 form, since it will determine whether you use a "No spouse" code or an "unknown spouse" code.

Item 19. (Is not to be coded)

Item 20. Birthdate

The code for birthdate is a two digit code and consists of the last two digits of the year of birth.

Item 20a. Ago (is not to be coded). However, this should be checked against birthdate to see that they are consistent.

Item 21. Birthplace

The code for birthplace will be a two digit code, and can be obtained from the appended code. The code specifies the United States by states, Japan by regions, Hawaii by counties, and other countries by country only.

Item 22, 29a, & 31. Alien Registration Number, Social Security Number, and Japanese Language School

A one digit code will be used to code all three of the above items. Whether or not a person has attended Japanese Language School is indicated in Item 31.

For example: A person having a social security number, but not an alien registration number and having attended Japanese School will receive the code 2.

Since the unrevised WRA 26 forms does not have Item 29a, we cannot code these schedules for social security number. Hence we have the separate codes indicated for these unrevised forms.

The code will be entered in "Office Use" column opposite Item 22.

Item 24. Grade

In Item 24 is listed the highest grade completed in school (if the person is not now attending school) or the grade attending (if the person is now in school.) If the highest grade completed was in Japan or some other country, the number of years of schooling is entered on the schedule rather than the highest grade completed. However, on the code sheet, you will notice that the code is made out for highest grade completed both in U.S. and Japan. Hence, Item 7 should be checked before coding Item 24. For example, if a person completed five years in a high school in Japan, he should receive the code E; or if he attended a grammar school in Japan for six years and had no more schooling, he would receive a code of L. In order to code highest grade, the number of years of education received at the last school attended will always have to be computed from the years listed under Item 7 if the person completed his education in another country. It should also always be checked for those who have completed their education in the United States.

Item 25. Language

A one digit code will be used to code the language ability of an individual. The abbreviations on the Code Sheet are as follows: (1) E-S means English-speak (2) E-SRW means English-speak, read, and write, and (3) J-SR means Japanese-speak and read.

The unrevised WRA 26 form does not indicate in Item 25 whether the person can write the language. Hence SR (speak and read) and SRW (speak, read, and write) are used interchangeably in our table for the code. For example, if a person can only speak Japanese and nothing else, he would receive the code 1. If a person could speak, read, and write both Japanese and English and could read another language, he would receive the code X.

If you find a combination of languages on a schedule for which the code is not indicated on the Code Sheet, refer the schedule to the supervisor.

All children 11 years and under will be given the code 9 (not applicable.) All deaf and dumb persons will also be coded not applicable.

Item 26. (Is not to be coded)

Item 27. Occupation

The occupational codes have already been inserted and verified. The only thing necessary to be done in this item is to indicate a blank where necessary. There is room for five occupational

-5-

codes on the punch card--primary, secondary, tertiary, and two potential occupational codes (which are items 27a and 27b). A line should be drawn in red for any of these five codes which is missing, so that the key punch operator will know how to skip the spaces where the code would be. A red check should be placed opposite all other codes that are to be punched. Third potential codes will not be checked or punched. ~~UNIQUE X IN ENTRY CODE~~

TO TY

Item 28. (Is already coded in Item 27)

Item 29. (Is not to be coded)

Item 30. Religion

This code is to be placed in the "Office Use" column for Item 26.

If the question is left blank, use the code 0; if "none", "no religion", or "undecided" is written in, use the code 0 also.

However, if the question is left blank on a schedule for a child under 12 years of age, the religion of the parents can be assumed for the child if the child's schedule is with the schedules of his parents. If the parents of the child do not have the same religion, then do not attempt to code the religion of the child.

A list of Buddhist and Shinto sects is available in cases when the sect may be listed rather than Buddhist or Shinto.

INTERPRETATIONS USED IN CODING ITEMS ON WRA 26
(Supplementary to Instructions to Coders)

As the coding of the Individual Records (Form WRA 26) progressed, certain questions arose which were not answered in the original instructions. The following interpretations of certain items have been used in coding the records.

Item 4 - Previous Address

A previous address code was added for Alaska since approximately 150 Japanese were evacuated from there.

Where the previous address is outside the four evacuated states, we have used the correct state code; and have used the county code as given in the code book for all states obtained from the Bureau of Agricultural Economics in Berkeley. The size of city code is obtained by finding the population of the city from the First Series 1940 Census for the particular state. A separate listing of all of those previous addresses is kept along with the code used so that the B. A. E. code book may be returned upon completion of the coding.

Item 5a. - Father's Occupation

On the original code for this item was a 0 code for "none" (i.e. had no occupation). However, in coding the records, we found that no such distinction was made and that a dash was used in most projects to mean none, blank, or unknown. As a result, we combined the 0 code with the code as it appears on the revised code sheet.

Item 7 - Education

In the second part of this code, years of schooling during, we have limited our interpretation to which years of the person's schooling out of a strictly chronological picture of the total education of each individual, and have not tried to interpret it as which grades. For example, if a person had 3 years of grammar school in the United States and then went to Japan and started grammar school in the first grade and continued for six years in Japan, he would receive a code of 4 in the second part of the education code, since his 4th through 9th years of schooling were in Japan.

We have included education in vocational schools in Japan in coding Item 7 (provided they were attended full time) although all of these schools are not included in Highest Grade Completed (Item 24). For example, some of the sewing schools attended by girls after grammar school are not recognized as high schools. Hence, they could not be coded in Highest Grade completed, although they would be included in years of schooling in Japan.

70 - Decrees

The teacher training program in Japan is essentially different from that in the United States. The Lower Normal Schools can be attended after 8 years of Primary School, and therefore, is coded at High School level in Highest Grade completed (Item 24). Upon completing a five year course in this school, the graduate is allowed to teach only in the primary schools. We do not code a graduate of this school as having a teacher's credential since the school corresponds only to a high school.

In order to enter the Higher Normal School which gives a credential to teach in High Schools, a person must have completed 4 years of high school. Graduates of this school receiving credentials are coded as having teacher's credentials.

Item 24 - Highest Grade

If the highest grade completed is in Japan but lower grades were later repeated in U. S., we have coded the Highest Grade completed in Japan.

VERIFICATION OF CODING OF WRA 26

The process of verification of the coding of the WRA 26 Individual Record will be essentially the same as the coding process itself. However, an additional internal consistency check will be carefully made simultaneously with verification. The particular items involved in this check should be carefully watched in verification of the coding. These items are listed in numerical order as nearly as possible in the following outline of the internal consistency check:

Internal Consistency Check

1. If there is an entry (or entries) in Item 7 indicating some education in Japan, check to see that there is an entry (or entries) in Item 8 for residence in Japan covering all periods of education there.
2. Look for discrepancies and errors where years are entered in Item 7 and 8. Older persons found it very difficult to remember years of education and residence, hence there may be obvious errors here in addition to typographical errors. For example: Often you may have overlapping years entered under separate schools, etc. Some of these inconsistencies can be straightened out by other information given on the schedule; others may have to be queried before they can be coded.
3. Check Item 16, Sex, and Item 19, Relationship to Head, for inconsistencies. For example: If sex is listed as "male" and relationship to head is listed as "wife", a correction must be made.
4. Check Item 20, Birthdate, and Item 21, Age, to see that they are consistent.
5. Check Item 21 before verifying the code for Item 8. If birthplace is Japan, then there should be one period of residence in Japan in Item 8 from the year of birth to the year of the first arrival in U. S. If there is no such entry in Item 8, refer to the schedule of the supervisor.
6. Check Item 23 the Item 7, which will indicate whether or not a person was attending school during the year 1941-42.
7. Item 24 will have to be checked with Item 7 for coding and verification of coding. If the highest grade completed was in the U. S., then verify that the entry in Item 24 is correct; if highest grade completed was in Japan, calculate highest grade (since only number of years listed in Item 24) and verify that it is coded accordingly.

VERIFICATION OF CODING OF WRA - 26.

Procedure for Correcting Errors in Coding

If you find an error in a code, erase the code on the schedule and insert the correct code in red pencil. Put an X in lead pencil to the right of the corrected code but inside the Office Use Box.

Keep the schedules in the same consecutive file number order as you receive them. Schedules with corrections on them should not be removed from the group of schedules you are verifying but should be placed at right angles to the others, so that it will be easy for the reverifier to verify the changes you have made.

Remember to initial each schedule verified in lead pencil on the line "verified by _____".

When you have finished verification of a group of schedules assigned to you, return them to your supervisors with the schedules containing errors at right angles to the others.

Procedure for Reverification of Corrections
Made on Schedules

The reverifiers will go through all the schedules and verify the corrections which have been made by the verifiers. All corrections will be indicated by an X in lead pencil on schedules at right angles to the main group and all codes so marked must be reverified. If the correction made in the code is accurate, erase the X in lead pencil and insert your initials on the line "reverified by _____". If you do not think the correction made is accurate, bring the schedule to your supervisor who will indicate the correct code.

WAR RELOCATION AUTHORITY
WHITCOMB HOTEL
SAN FRANCISCO
TULE LAKE REGIONAL STATISTICAL OFFICE

November 6, 1942

Procedure for Final Check and Shipment to San Francisco

When the coding and verification of the WRA 26 Individual Records are complete, a final check will be necessary before sending the schedules to San Francisco for punching. This check will consist of three parts:

Check on Completeness of Coding and Verification

1. Check that there is a code for all items which should be coded and that the code is in the correct place.
2. Check each schedule for codes which may be marked with an X in lead pencil. Any such mark on a code indicates that it must be reverified (i. e. it was overlooked in reverification) and hence should be turned over to the supervisor.
3. Check all schedules for red marks of any kind other than codes. If any such marks are found, refer the schedule to the supervisor.

Check on Completeness and Accuracy of File Numbers

1. Check each folder of schedules separately, verifying that the file numbers are consecutive and accurate (check all 6 digits carefully for errors). The schedules will be in lots just as they were shipped since this order was kept all through the coding process.

Fill out Transmittal Forms and Ship Schedules to San Francisco

1. A transmittal form to accompany all shipments of schedules to San Francisco should be made in triplicate, two copies to go to San Francisco with the shipment and the other to remain here for the Tule Lake Regional Statistical Office File. The schedules will be shipped to San Francisco in the same lots as they were sent from San Francisco.

INSTRUCTIONS FOR PUNCHING FORM WRA-26

General Instructions:

1. Records must be kept in the order in which they are found in each folder, and are to be kept in the folder in which they come. Punch cards should be kept in the order of the records, and in batches to correspond with the folders.
2. One card only is to be punched for each Record, irrespective of any red notes stating that more than one card should be punched.
3. Everything to be punched is in red, except the name which is typed.
4. Everything to be punched is in the column headed 'Office Use' except the name, the file number, and the Individual Number (Item 14). The file number is written in red in the upper left-hand corner of each Record.
5. Everything is to be punched in the order listed, reading from top to bottom, except the file number which is the last information punched.
6. All information to be punched appears on the front of the Individual Record; ignore the information on the back of the page.

Specific Cautions and Instructions:

1. Name. 10 columns are allowed for the last name. For last names containing more than 10 letters, punch the first 10 letters of the name only. 8 columns are allowed for first names. For first names containing more than 8 letters, punch the first 8 letters of the name only. For middle names, punch the initial only.
2. Care should be taken that certain codes should be differentiated:
 - a. Capital 'I' and the figure (1).
 - b. Capital (O) always has a loop at the top, while zero is written as a plain circle (0).
 - c. Capital 'O' and capital 'Q'.

Forestry (Except Logging) and Hunting and Trapping Occupations

- 91 Forestry occupations, except logging
- 96 Hunting and trapping, n.i.o.c.
- 97 Hunters and trappers

Semi-skilled, Semiskilled, and Unskilled Occupations

Note: The number of the preceding occupational groups extends across two or more of the six-digit levels. Those levels are differentiated by the first digit, which is the code number of the group, except for a continuing constant for the entire occupational group. The second six-digit number is the first digit of the other six-digit levels of the occupational group with 112075 being the only exception. This relationship also holds true for the two-digit and three-digit numbers.

Five Digit Previous Address Code for Alaska

Alaska has no county organization but is divided into four judicial divisions which are treated, for census purposes, as equivalent to county areas.

The previous address code (Item 4) for Alaska will be a five digit code consisting of the two digit code for the Territory of Alaska, a two digit code for the judicial division and a one digit code for the size of city.

The code for the Territory of Alaska is 81.

The judicial division for each town or village in Alaska can be obtained from Table 5, p. 5, of First Series Census of 1940 for Alaska. The codes for the four judicial divisions are as follows:

- 01 First Judicial Division
 - 02 Second Judicial Division
 - 03 Third Judicial Division
 - 04 Fourth Judicial Division

The fifth digit size of city code for all cities, towns and villages except the four listed below will be 0 since these four places are the only ones with a population of 2500 or more. The fifth digit for the following cities are:

- 1 Anchorage City
 - 1 Fairbanks Town
 - 2 Juneau City
 - 1 Ketchikan Town

For example: Code for Juneau City is 378110, tick 200000
St. Olaf College, University
2nd stage
Fall River, Wisconsin

CODES FOR PREFECTURES AND POSSESSIONS BY REGIONS*

(*Regions: Japan Unspecified 0; Sakhalin or Saghalien or Karafuto Is. 1; Hokkaido or Yezu 2; Honsau or Honshu Is. Northern 3, Central 4 and 5, Southern 6, Urcan Prefectures 7; Shikoku Is. 8; Kiushiu or Kyushu 9; Formosa or Taiwan π ; Chosen or Korea α .)

Instructions for Punching Form WRA - 26

- d. Capital 'U' and capital 'V'.
- e. ~~A~~ should not be confused with a lower-case letter, since no lower case letters are ever used.
- 3. The code ~~T~~ indicates a punch in the eleventh position. The code ~~S~~ indicates a code in the twelfth position.

- 4. A red dash in the code column indicates a spacing to be made by the operator in every instance except Item No. 27.

In Item No. 27, a red dash standing alone indicates 3 spacings to be made by the operator. A dash within a code should be ignored. For example, in Item No. 27, the codes 0-72, 0~~7~~7, and a dash should be punched as follows:

072, 0~~7~~7, and 3 spaces (---).

- 5. Codes in parentheses indicate multiple punching. All codes to be punched in the same column.

- 6. In Item No. 27, all capital 'X's which appear should be punched as .

- 7. There are slight differences in the set-up of the revised and the unrevised Forms WRA - 26, but the coders have taken that into consideration and operators need not take any notice of the difference in the two forms.

Memorandum

TO : Mr. James Paulauskas
Social and Economic Records Division, NARS
Washington, D.C. 20408

Date: January 30, 1968

FROM : Research Archivist
Federal Records Center
San Francisco, California 94105
SUBJECT: WRA Code Books

In reply refer to: 9NCS

I am attaching the copies of the WRA Code Books which were sent to our Los Angeles Center by Mr. John Modell, Director of Research at UCLA's Japanese American Research Project. Their address is 288 Kinsey Hall, Los Angeles, California 90024.

Mr. Modell suggested that you might wish to receive a copy of "marginals" (percentages for each coded column) which they will soon compute. We can secure this material for you when it is available.

ARTHUR R. ABEL

Part 5: Occupation Codes and Coding Instructions

WAR RELOCATION AUTHORITY

SUPPLEMENTARY INSTRUCTIONS TO OCCUPATIONAL CODERS
VERIFICATION OF CODES

(WRA Form 26-Rev.1)
September 14, 1942

It seems advisable to make arrangements at this time for the verification of occupational titles and code numbers which are being entered on the Individual Records (WRA Form 26-Rev.1). As a whole the results have been exceptionally good. However, no matter how much care is taken in any such undertaking, mistakes are bound to occur. In addition, inconsistencies due to misunderstandings and to individual interpretations of instructions must be expected. For this reason, each Census Manager is urged to initiate the following proposals without delay. Please retain all schedules on the Project after receiving this communication until the verification of occupational titles and codes as described below has been completed.

As a general rule, for approximately each ten occupational coders (or classifiers) there shall be one verifier. (In the beginning, more may be necessary to take care of the backlog which has accumulated.) The primary duties of the verifier will be to analyze the schedules coded by the ten interviewers assigned to him for completeness, accuracy and consistency of occupational titles and code numbers.

The Census Manager will maintain uniformity of verification by frequent conferences with his group of verifiers and by spot checks of their verifications. Census Managers are also urged to submit to the Employment Division of the Regional Office any matters which need clarification or which, in their opinion, would make for more meaningful or consistent occupational coding. However, current directions should be followed until clearance is obtained.

The verifiers will initial each Individual Record directly below the name of the Interviewer on the lower part of the back of the record. Incorrect occupational titles may be crossed out and the proper title inserted; incorrect codes will be erased and the proper ones entered. Black pencil only will be used by verifiers for corrections, new titles and codes, and for initialing.

Each verifier will keep a record of all additions and changes which he makes. These correction records will be retained by the Census Manager for his use in clarifying coding practices. Correction Sheets already devised in the Regional office for WRA Form 26-Rev.1 may be used for this purpose. However, lists of corrections and additions need not be sent to the Regional Office if all copies of the Individual Record are on the Project at the time of correction.

Those persons best qualified to assume the additional responsibilities connected with verification will of necessity be those who have had experience in the Census Project, first as interviewers and later as occupational classifiers. Depletions in the ranks of coders will be filled from the interviewers and needed interviewers will be trained.

We would appreciate an acknowledgement of the receipt of this communication from each Census Office Manager.

Arbitrary Distinctions to be Followed:

1. HOUSEMAN (Houseboy, housekeeper when the only servant, utility man, but not YARDMAN) 2-04

It is recognized that the duties performed by most housemen are more extensive than those listed in the job description for this title in the Dictionary.

2. YARDMAN - "Works by the day, performing any outdoor duties assigned by employer: mows the lawn and cares for flowers and shrubbery." Dict. p. 1035 2-01
DAY WORKER "Performs, in accordance with instructions from employer, any domestic duty, such as..... Is employed by the day." Dict. p. 264 2-01

3. GARDENER "Keeps flowers, trees, and premises about home in a healthy and attractive condition: plants, transplants, fertilizes, sprays, prunes, and otherwise tends to the cultivation of flowers, bushes, fruit trees, or other shrubbery on premises or in a greenhouse. May perform other duties...." Dict. p. 404 3-40

In order to differentiate those people who have the knowledge and skill necessary to enable them to plan gardens and execute the plans, from those who merely do work as directed, use the GARDENER code for the former (3-40) and the DAY WORKER code for the latter (2-01). Either may have worked for one or more people at one time. The GARDENER may have had others working under his direction.

Note Distinctions Between:

sales manager)	-	0-97
" person)	in store	1-75
" clerk)		1-70
" man	outside store	Depends on commodity

Note Combinations of skills and how coded:

Farmer and farm laborer	Farmer: Depending upon kind of farm
Farmer and farm foreman	3-37

Unpaid family workers:

1. Housewives receive no code unless they have done housework in someone's house not their own.
2. Children who have assisted on parents' farms receive a code if there is sufficient experience to justify code.

Workers not in the Labor Force because of age or physical condition:

Codes should be given which their previous training and work experience indicate.

SKILLS AND Hobbies MOST FREQUENTLY CODED
UNDER 27a and 27b.
(Incomplete List)

<u>HOBBY OR SKILL</u>	<u>TITLE</u>	<u>CODE</u>
Swimming)

Personal who have the ability and desire to do work in various fields of service, including the following:

CLERICAL SERVICE WORK

Personal who have the ability and desire to do work in various fields of service, including the following:

GUIDE TO ENTRY-OCCUPATIONAL CLASSIFICATION

Entry-Occupational Codes are intended for use in classifying certain groups of applicants for whom the regular occupational structure of the Dictionary does not provide. These are applicants with limited work histories, students with preparatory training but no actual experience or those who for any reason are not fully qualified for a specific occupation. It is recognized that justification is as essential for an Entry Code as for any other and that such codes cannot be assigned on the basis of desire or interest alone.

PROFESSIONAL, TECHNICAL AND MANAGERIAL WORK

O-X1 - Artistic Work

Persons who have the ability to do, or learn to do, creative work such as decorating, painting, or sculpturing which requires imagination and taste as well as the acquiring of considerable skill through comprehensive training or experience.

O-X2 - Musical Work

Persons who have the ability to do, or learn to do, work in the composition, singing, or playing music. Imagination and taste and the capacity to combine tones pleasantly and expressively according to the laws of melody, harmony, and rhythm are required, as well as the ability to acquire considerable skill through specialized training or experience.

O-X3 - Literary Work

Persons who have the ability to learn to create and present material such as speeches, descriptive prose, novels, and poems through the medium of written words. Imagination and taste and demonstrated facility in use of words are required as well as the ability to acquire considerable skill through specialized training or experience.

O-X4 - Entertainment Work

Persons who have the ability to do, or learn to do, work which involves engaging the attention of people in an agreeable, amusing, or diverting manner in various forms of entertainment such as acting, dancing, and impersonating.

O-X6 - Public Service Work

Persons who have the ability to do, or learn to do, work which involves the educating, instructing, guiding, assisting and counseling of children and adults, and who possess personality traits that inspire in others an attitude of wholesome, confident, and trusting regard. The ultimate job functions performed by persons in this classification include the dissemination of scholastic knowledge, the facilitation of mental and physical well-being, and the solution of social, economic, and personal problems. Ability to acquire and apply specialized training or practice-experience or a combination of both is usually necessary.

O-X7 - Technical Work

Persons who have the ability to do, or learn to do, work which involves the acquisition, understanding, development, and application to persons or situations of systematized knowledge including such fields as pure or applied science, medicine, law, personnel, and statistics. Ability to acquire and apply extensive specialized training or practice-experience or both and evidence of scientific curiosity and the capacity to progress in a designated field are necessary.

O-X8 - Managerial Work

Persons who have the ability to do, or learn to do, work which involves planning, supervising, coordinating, and guiding activities of other persons and enterprises either in accordance with stipulated authority in conjunction with a particular official position or in the assumption of official responsibility in the formation and execution of plans and the transaction of business. Ability to deal with and lead people is essential and ability to acquire and apply specialized training may be necessary.

CLERICAL AND SALES WORK

1-X1 - Computing Work

Persons who have the qualifications and interest to do, or to learn to do, work which involves detailed computations and the compilation of statistical records and reports. Workers may be required to do a variety of tasks, such as preparing tables of rates and charges, drafting reports based on business records, and making tabulations of such items as sales, costs, and expenditures.

1-X2 - Recording Work

Persons who have the qualifications and interest to do, or to learn to do, detailed work which entails the rapid, accurate, legible transcription of data containing numerous items and figures. Workers may be required to perform such tasks as entering transactions, posting entries, balancing accounts, making bills and invoices, and recording material on special forms, either with or without the use of a business machine.

1-X4 - General Clerical Work

Persons who have not become proficient in a specific phase of clerical work but are suitable for jobs which are made up of one or more simple tasks requiring little special knowledge, but reliable attention. Workers must be able to concentrate on the detailed and more routine tasks in business offices, and must be able to apply themselves to work which is more or less unvaried.

1-X5 - Public Contact Work

Persons whose personal qualifications and training fit them for work, the principle requirement for which is the ability to meet and deal with people. Workers may be required to work either in an establishment or on the outside, and must be able to make a good first impression upon persons contacted.

SERVICE WORK

2-X1 - Cooking

Persons who have the ability and interest to do, or to learn to do, work which involves the handling and preparation of foods, and who may have had casual or avocational experience in cooking. Workers may be required to have or obtain familiarity with cooking processes, such as broiling, roasting, and stewing, and should have the ability to follow recipes in the preparation of various dishes.

2-X3 - Child Care

Persons who have the ability and interest to work with children. Workers are expected to attend to the care and amusement of children, and to contribute to their physical, mental, and social development. This work requires personal characteristics which invite the respect, obedience and friendship of children.

2-X5 - Personal Service

Persons who possess the interest and the personal characteristics which enable them to respond readily to the needs and wishes of their employers. Work may be performed in either a domestic or commercial establishment, and is characterized by close personal contact with employer or customers of the employer in attending to their comfort, appearance, clothing, or other similar personal needs and desires.

AGRICULTURAL, FISHERY, AND FORESTRY WORK

3-X1 - Farming

Classification for individuals who have an interest, background, or evidence of ability to learn some or all of the following tasks:

1. Raising and harvesting of crops to be used as food for human or animal consumption and for industrial purposes.
2. Breeding and raising of poultry, livestock, and other animals for food, furs, wool, feathers, hides, or for show or utility purposes, or for pets.

3-X8 - Fishery Work

Classification for individuals who have an interest, background, or evidence of ability to learn the catching of clams, fish, lobsters, oysters, seals, sponges, and other marine life, and the gathering of aquatic shells and plants for food or for such industrial products as fish meal, oil, or fertilizer. (Occupations in the canning or preserving of fish or similar products are not included.)

3-X9 - Forestry Work

Classification for individuals who have an interest, background, or evidence of ability to learn tasks involved in the development and care of forests and the growing and gathering of forest products; or tasks involved in hunting and trapping or the guiding of hunting and trapping parties.

MECHANICAL WORK

4-X2 - Machine Trades

Persons who have the ability and interest to do work involving the planning and performing of tasks that require, in addition to the use of tools, and equipment, the understanding of how machines operate. This understanding may be needed to maintain, adjust, and repair the machine with which the worker is identified; or to enable him to participate in the building, servicing, or maintenance of machines. The worker must be able not only to learn the operation of machines, but also must have the faculty of readily understanding how machines operate.

4-X6 - Crafts

Persons who have the ability and interest to do work which involves planning and carrying out of work that requires skillful use of hand tools and equipment. Machines may be used by the worker, but such machines are used as aids in the accomplishment of the tasks of the occupation, and the worker does not have to understand how they operate and does not have to maintain and repair them.

MANUAL WORK

6-X2 - Observational Work

Persons who have the ability and interest to do work which involves alertness in watching automatic machine processes, and the ability to understand simple mechanical operations in loading a machine or starting a process. As a general rule, workers are not required to make adjustments in the machines they operate, but only to be able to recognize operations which are not normal and to call in another worker for adjustment of the difficulty.

6-X4 - Manipulative Work

Persons with the ability and interest to do repetitive work which involves rapid coordination and facility in handling tools. Workers must be able, in most cases, to work rapidly in doing such tasks as making assemblies, wrapping small articles, or manually feeding a repeating machine.

6-X6 - Elemental Work

Persons who are suited for simple routine work that requires primarily the ability to follow specific instructions and to understand the tasks assigned. This includes factory, domestic, institutional and farm work that does not require special knowledge. This work may or may not require considerable physical strength.

4 and 5 indicate the skilled levels
6 and 7 indicate the semiskilled levels
8 and 9 indicate the unskilled levels

In the following list of code numbers, where occupational groups extend over two or more of the skill levels, the index digit of each skill level is given. Thus 4,6,8-00 indicates that there are skilled, semiskilled, and unskilled levels within the occupational group, whereas 4,6,00 would indicate that only the skilled and semiskilled levels are represented.

Occupations in Manufacturing and Related Activities
(4,6,8-00 through 5,7,9-18)

- 4-01 Bakers Occupations in Production of Food Products
4,6,8-02 Occupations in production of bakery products, n. o. c.
4,6,8-03 Occupations in production of beverages
4,6,8-04 Occupations in canning and preserving of foods
4,6,8-05 Occupations in production of confections
4,6,8-06 Occupations in processing of dairy products
4,6-07 Millers, grain, flour, feed, etc.
4,6,8-08 Occupations in production of grain-mill products, n. o. c.
4,6,8-09 Occupations in slaughtering and in preparation of meat products
4,6,8-10 Occupations in production of miscellaneous food products

Occupations in Manufacture of Tobacco

- 4,6,8-12 Occupations in manufacture of tobacco products

Occupations in Manufacture of Textiles

- 4,6,8-14 Occupations in manufacture of knit goods
4-15 Weaver, textile
4-16 Loom fixers
4,6-18 Nonprocess occupations, in manufacture of textiles, n. e. c.
4,6,8-19 Occupations in manufacture of textiles, n. e. c.

Occupations in Production of Fabricated Textile Products

- 4,6,8-21 Furriers and occupations in fabrication of fur goods, n. e. c.
4-23 Milliners
4,6,8-24 Occupations in manufacture of hats and caps, n. e. c.
4,6-25 Dressmakers and seamstresses
4-26 Tailors and tailoresses
4,6,8-27 Occupations in fabrication of textile products, n. e. c.

Occupations in Production of Lumber and Lumber Products

- 4,6-29 Inspectors, scalers, and graders, logs and lumber
4,6,8-30 Lumbermen, raftsmen, and woodchoppers
4,6,8-31 Sawmill occupations, n. o. c.
4-32 Cabinetmakers
4,6,8-33 General woodwork occupations, n. o. c.
4,6-34 Planing mill occupations, n. o. c.
4,6-35 Upholsterers
4,6,8-36 Occupations in manufacture of furniture, n. o. c.
4,6,8-38 Cooperage occupations, n. o. c.
4,6,8-39 Occupations in manufacture of miscellaneous finished lumber products,
n. o. c.

Occupations in Production of Paper and Paper Goods

- 4,6,8-41 Occupations in manufacture of paper and pulp
- 6,8-42 Occupations in manufacture of paper goods.

Printing Occupations

- 4,6-44 Compositors and typesetters
- 4-45 Electrotypers and stereotypers
- 4-46 Lithographers
- 4-47 Photoengravers
- 4-48 Pressmen and plato printers, printing
- 4,6,8-49 Occupations in printing and publishing, n. o. c.

Occupations in Production of Chemicals and Chemical Products

- 4,6,8-50 Occupations in production of paint and varnish
- 4,6,8-51 Occupations in production of rayon and allied products
- 4,6,8-52 Occupations in production of industrial chemicals
- 4,6,8-53 Occupations in production of chemical products, n. o. c.

Occupations in Production of Petroleum and Coal Products

- 4,6,8-55 Occupations in refining of petroleum
- 6,8-56 Occupations in production of miscellaneous petroleum and coal products

Occupations in Production of Rubber Goods

- 4,6,8-57 Occupations in production of rubber goods

Occupations in Manufacture of Leather and Leather Products

- 4,6,8-59 Occupations in manufacture of leather
- 4-60 Shoemakers and shoe repairmen, not factory
- 4,6,8-61 Occupations in manufacture of boots and shoes
- 4,6,8,62 Occupations in manufacture of leather products other than boots and shoes

Occupations in Production of Stone, Clay, and Glass Products

- 4,6,8-65 Occupations in production of glass and glass products
- 4,6,8-66 Occupations in production of clay products
- 6,8-67 Occupations in production of cement, concrete, gypsum, and plaster products
- 4-68 Stonecutters
- 4,6,8-69 Occupations in stoneworking, n. o. c.
- 4,6,8-70 Occupations in production of asbestos products, abrasives, and polishing products.

Metalworking Occupations

- 4-71 Jewelers, watchmakers, goldsmiths, and silversmiths
- 4,6,8-72 Occupations in manufacture of clocks, watches, jewelry, and articles of precious metals, n. o. c.
- 4-73 Engravers
- 4,6,8-74 Occupations in electroplating, galvanizing, and related processes

- REPRODUCED AT THE NATIONAL ARCHIVES
- 4-75 Machinists
 - 4-76 Toolmakers and die sinkers and setters
 - 4,6-77 Filers, grinders, buffers, and polishers (metal)
 - 4,6,8-78 Machine shop and related occupations, n. o. c.
 - 4-80 Tinsmiths, copper smiths, and sheet metal workers
 - 4,6-81 Moldors
 - 4,6,8-82 Foundry occupations, n. o. c.
 - 4,6-83 Boilermakers
 - 4,6,8-84 Structural-and ornamental-metal workers
 - 4,6-85 Welders and flame cutters
 - 4,6-86 Blacksmiths, forgemen, and hammermen
 - 4,6,8-87 Heat treaters, annealers, and temperers
 - 4,6-88 Occupations in mechanical treatment of metals (rolling, stamping, forging, pressing, etc.), n. o. c.
 - 4,6-90 Oro dressing occupations
 - 4,6-91 Furnacemen, smelters, and pourers
 - 4,6,8-92 Occupations in production of ferrous and non ferrous metals, n. o. c.
 - 4,6,8-93) Occupations in fabrication of metal products, n. o. c.
 - 4,6,8-94)
 - 4,6-95 Inter-industry metal working occupations, n. o. c.

Electricians and Occupations in Manufacture of Electrical Equipment

- 4-97 Electricians
- 4,6,8-98 Occupations in manufacture of radios and phonographs
- 4,6,8-99 Occupations in manufacture of electrical machinery and accessories, n. o. c.
- 5,7,9-00 Occupations in manufacture of miscellaneous electrical equipment, n.o.c.

Occupations in Manufacture of Transportation Equipment

- 7,9-02 Occupations in manufacture of automobiles, n.o.c.
- 5,7,9-03 Occupations in building of aircraft, n. o. c.
- 5,7,9-05 Occupations in building transportation equipment (except automobiles and aircraft), n. o. c.

Occupations in Manufacture of Miscellaneous Products

- 5-08 Opticians, lens grinders, and polishers
- 5,7,9-09 Occupations in manufacture of professional and scientific apparatus, n.o.c.
- 5,7,9-10 Occupations in manufacture of fabricated plastic products
- 5-12 Piano and organ tuners
- 5,7,9-13 Occupations in manufacture of miscellaneous products.

Miscellaneous Manufacturing Occupations

- 5,7,9-16 Paintors, except construction and maintenance
- 5,7-17 Pattern and model makers, except paper
- 5,7-18 Dyers

Occupations in Nonmanufacturing Activities (5,7,9-20 through 5,7,9-61)

Occupations in Extraction of Minerals

- 5,7,9-20 Occupations in production of petroleum
- 5,7-21 Miners, and mining-machine operators
- 5,7,9-22 Occupations in extraction of minerals, n. o. c.

Construction Occupations

- 5,7-23 Construction machinery operators, n. o. c.
- 5,7-24 Brick and stone masons, and tile setters
- 5-25 Carpenters
- 5,7-26 Cement and concrete finishers
- 5,7-27 Painters, construction and maintenance
- 5-28 Paperhangars
- 5-29 Plasterers
- 5-30 Plumbers, gas fitters, and steam fitters
- 7-31 Roofers and slaters
- 5,7,9-32 Construction occupations, n. o. c.
- 5,7-33 Asbestos and insulation workers

Transportation Occupations

- 7,9-35 Roustabout
- 5,7-36 Chauffeurs and drivers, bus, taxi, truck, and tractor
- 5,7-37 Teamsters
- 5,7-38 Brakeman, railroad
- 5-39 Conductors, bus and street railway
- 5,7-40 Motorman, (vehicle), except railroad, railway, and bus
- 5-41 Locomotive engineers
- 5-42 Locomotive firemen
- 5-43 Motorman, street, subway, and elevated railway
- 5,7-44 Switchman, railroad
- 7-45 Gateman, and train callers
- 7,9-47 Longshoremen and stevedores
- 5,7,9-49 Transportation occupations, n. o. c.
- 7,9-48 Sailors and dockhands, except U. S. Navy

Communication and Utility Occupations

- 5-51 Power station operators
- 5,7-53 Lineman and service men, telegraph, telephone, and power
- .7,9-54 Occupations in furnishing utilities, n. o. c.

Trade and Service Occupations

- 5,7-55 Motion picture projectionists
- 5,7,9-56 Amusement, recreation, and motion picture occupations, n. o. c.
- 5,7,9-57 Occupations in laundering, cleaning, dyeing, and pressing apparel and other articles
- 5,7-58 Meatcutters, except in slaughtering and packing houses
- 5,7,9-59 Occupations in trades and services, n. o. c.
- 7-60 Attendants, filling stations and parking lots.

Public Service Occupations, n.o.c.

- 5,7,9-61 Public Service occupations, n.o.c.

Miscellaneous Occupations
(5, 7, 9-63 through 5, 7, 9-89)

- 7,9-63) Nonprocess occupations in manufacturing, n. o. c.
7,9-64)
7,9-65)
7-68 Packing, filling, labeling, marking, bottling, and related occupations
n. o. c.
7-70 Firemen, other than process firemen
7,9-71 Oilers of machinery
5,7-72 Enginercs, stationary
5,7-73 Cranemont, derrickmen, hoistmen, and shovelman
5,7-74 Blasters and powdermen
5,7-75 Drillers, extraction of minerals and construction
5,7-76 Inspectors, n. o. c.
5,7,9-77 Glaziers
5-78 Millwrights
5,7-79 Mechanics and repairmen, railroad and carshop
5-80 Mechanics and repairmen, airplane
5,7-81 Mechanics and repairmen, motor vehicle
5,7,9-83 Mechanics and repairmen, n. o. c.
5,7-84 Tool sharpeners and dressers
7,9-85 Garage laborers and car washers and greasers
5,7,9-86 Photographic process occupations
7,9-87 Chainmen, rodmen, and axmen, surveying
5,7-88 Warehousing, storerooming, handling, loading, unloading, and related
occupations, n. o. c.
5,7,9-89 Miscellaneous occupations, n. o. c.

Foromen
(5-91 through 5-99)

- 5-91) Foromen, manufacturing
5-92) Foromen, extraction of minerals
5-93 Foromen, construction
5-94 Foromen, transportation, communication, and utilities
5-95 Foromen, services, amusements
5-99 Foromen, N. o. c.

Apprenticos
(7-93 through 7-99)

- 7-93 Carpenters' apprentices
7-94 Machinists' apprentices
7-95 Electricians' apprentices
7-96 Plumbers' apprentices
7-97 Apprenticos to other construction and hand trades
7-98 Apprenticos to printing trades
7-99 Apprenticos to other trades

Part 6: Miscellaneous Codes and Information

UNITED STATES GOVERNMENT

GENERAL SERVICES ADMINISTRATION

Region 9

San Francisco, California 94103

Memorandum

Mr. Paulauskas

TO : Social and Economic Records Division, NARS
Washington, D. C.

Date: January 25, 1968

FROM : Regional Director, NARS
San Francisco, California

In reply refer to: 9N

SUBJECT: Copy of Guide to Use of IBM Cards
and WRA Form 26 - Telcon Mr. Pearlman

Attached is a copy of the typewritten Guide to WRA Form 26, from records held at the Bancroft Library, UC - Berkeley.

Mr. Gil Dorame, Reference Service Branch Chief, FRC-LA, will obtain a copy of the "key" from the University Library, UCLA. The latter material should be forwarded to you by the end of January.

H. J. KOENIG

Attachment

Buy U.S. Savings Bonds Regularly on the Payroll Savings Plan

- 1) 14 carton boxes of IBM cards arranged alphabetically
- 2) WRA form 26's in bound volumes arranged by number and project

Mansanar:	100,000	through	110,637;	volumes	1 through	55	
Poston:	200,000	"	218,467;	"	54	"	145
Gila:	300,000	"	314,022;	"	146	"	215
Tule Lake:	400,000	"	415,612;	"	216	"	293
Minidoka:	500,000	"	510,191;	"	294	"	344

Jerome:	950,000	"	958,599;	"	526	"	568

Note: Re-use of IBM cards and WRA form 26's:

WRA form 26's are in order of interview, each person being assigned at that time a number. These numbers also appear on IBM cards accompanying these forms which have been thrown into alphabetical order. They therefore serve as a locator file for the form 26's. For example, on the IBM card for Kay Araki, the first number to the right of the name, there are two numbers, the first of which is the family identification number (214720). Kay Araki is the seventh member listed in the family with No. 21472. This number is to be disregarded. The number on the extreme right indicates the number of her form 26 (607167). Her form is in the volume which includes numbers, 607,000 through 607,199.

Under no circumstances should the IBM cards be sorted out of this alphabetical order since it cost over \$200 to have it sorted. Furthermore, the cards are wearing out and there were errors in the mechanical sorting even for this alphabetical arrangement. Most of these errors we have corrected by hand sorting. Any person or agency who desires to use these cards for statistical purposes should arrange for duplicate punching with consent of the Library Committee Subcommittee.

Code Miscellany.
